

Vintage Tube Services

To place an order or for a free phone consultation, please call me. I'm Andy and my number is 616.454.3467.

Thank you. I appreciate your business.

Rectifiers Stock List

<u>Type</u>	<u>Manufacturer</u>	<u>Date</u>	<u>Microphonics</u>	<u>Quantity</u>	<u>\$ Each</u>	<u>Descriptions</u>
5U4-G	R.C.A.	1940's	High voltage	16	\$36.00+	The classic big bottle units that built
		50's	test			America. Long lasting, strong and pure.
						The large clearances, absence of mica
						and the hard vacuum these units posses
						gives them a very high noise rejection
						ratio compared to units made today
						their ultra pure metallurgy and chemistry
						combined with 50+ years of RCA
						expertise make for a truly long lasting
						and sweet tube.
5U4-GT	R.C.A.	1952 +	High	7	\$32.00	The re-engineered straight sided issue
			voltage			that loses the press. As with most of the
			test			re-engineering efforts this one was
						primarily for more reliable TV service.
						This did not really help Hi-Fi at all.
						Overall it was an even brake.
5U4-	R.C.A.	1955-	High	8	\$32.00	Here come the series string tubes, same

GTB		70's	voltage			as above but with more tightly controled
			test			heater ribbon.
5U4-G	Sylvania	1940's	High	42	\$30's	Another winner! Same story as R.C.A.
		50's	voltage			
			test			
5U4-GT	Sylvania	50-55	High	6	\$20's-\$30's	Same modernizing changes as R.C.A.
			voltage			
			test			
5U4-GTB	Sylvania	55-65	High	12	\$20's	Still a very nice tube.
			voltage			
			test			
5U4-GY	Tung-Sol	1940's-	High	8	\$28-\$38	Another Winner, same story as R.C.A.
		1960's	voltage			& Syl. The Y means extra high voltage
			test			Micanol base.
5R4-G	R.C.A.	1940's-	High	6	\$28-\$38	A higher voltage & current relative of the 5U4,
		60's	voltage			it went through the same modernizing
			test			changes as the 5U4.
5R4-GY	R.C.A.	1940's	High	6	\$28-\$38	A beautiful, tall, full size rectifier tube and
			Voltage			STILL a workhorse of the industry after
			test			60 YEARS!!! The tube industry is
						admittedly much smaller now but damm
						what a record for an electronic
						component! Special mica laced base
						(Micanol) for strong resistance to arc-

						over and many other special features.
5R4- WGB	Chatham Ele. (Tung-Sol)	1950's- 60's	High Voltage test	85	\$18-\$30's	The classic flat top, super tough, ruggedized 5R4 with silicone rubber bonding of bulb to base.
5R4- WGB	Raytheon	1960's- 70's	High Voltage test	11	\$12-\$32	Each company had its own tooling for this tube and each was a work of art. This version extended the cathode wires way up into the top of the bulb above the plates and makes for two cool glowing V's at the top.
5R4- WGB	Cetron	1 970's	High Voltage test	4	\$12- \$28.00	Post T-S tube made in Lafox IL. Nearing the last time these will be made for Uncle Sam. Let the Chinese or the Russians try to copy this one.
5 Z3	R.C.A.	1955	High Voltage test	1	\$22.00+	Classic four pin rectifier, predecessor to the 5U4.
5Z3	Sylvania	1940's	High Voltage test	2	\$22.00+	Syl. Version of above
80	R.C.A.	1949	High Voltage test	5	\$22.00+	Classic radio rectifier from the 30's ST style.
80	Raytheon	1957	High	8	\$28.00	Same ST style as above.

			Voltage			
			test			
83	R.C.A.	1950's-	High	4	\$18-\$32	Rectifier used in Hickok testers & other
		70	Voltage			units
			test			
83	G.E.	1960's	High	2	Call	Strange different ones, no vapor inside,
			Voltage			looks like a 5V4 inside?
			test			
5Y3, 5Y4						I have a hundreds of these, many
5V4,6X5,						special versions also from all the good
6AX5,ect						companies going back to the 40's. Call
						for details.
5AR4	Mullard	1950's	High	Call		The metal base version. See below.
			Voltage			
			test			
5AR4	Mullard	1960's	High	8	\$86.00	One of the original Mullard " last
			Voltage			forever" tubes. Like the EL-34 the
			test			5AR4 is as tough as nails and supplies
						a strong, beautifully black, velvety
						quiet background for the music.
5AR4	Mullard	1970's	High	4	\$76.00	1970's version of above, still going
			Voltage			strong! A good tube to the end.
			test			
5AR4	Amperex	1950's-	High	3	\$80's	I have several in stock at any time

		6 0's	Voltage			basically the same tube as the Mullard
			test			but made in Holland by the Dutch.
5AR4	Sylvania	1970's	High		\$60's	The finest non-European 5AR4 made.
			Voltage			Gaining popularity fast. Good long-
			test			lasting tube.
5AR4	General Electric	1960's &	High		\$50's	One of the few good tubes GE ever made.
		1970's	Voltage			Tough, long lasting and strong.
			test			
5AR4	All Others					I wouldn't touch them with a ten foot
						pole. This is not a place to fool around
						if you cant afford a couple of these
						every half a century try a lower priced
						hobby like marbles.
6CA4/ E Z-81	Telefunken	1960	High	1	\$44.00	A beauty the only one I have.
			Voltage			
			test			
6CA4/ EZ-81	Amperex	1960's	High	11	\$30's	The great 9 pin 150 Ma. Rectifier
			Voltage			from The 50's. I stock these from all
			test			three Decades. All are good the earlier
						ones tend to last a bit longer.
6CA4/ EZ-81	Mullard	1950's-	High	6	\$26-\$38	Same as above. These like the EL-84
		60's	Voltage			these will run great even if they look
			test			as dark as cigars!
6CA4/	R.C.A.	1960's	High	8	\$18-\$28	Good R.C.A. version. Long lasting.

EZ-81			Voltage			
			test			
6V4/	Telefunken	1960's	High	2	\$38.00	Same as applies to EZ-81 above.
EZ-80			Voltage			
			test			
6V4/	Mullard	1960's	High	4	\$32.00	Same as applies to EZ-81 above.
EZ-80			Voltage			
			test			
6V4/	Amperex	1960's	High	4	\$32.00	Same as applies to EZ-81 above.
EZ-80			Voltage			
			test			
6X4/	Mullard	1960's	High	2	\$28.00	These little guys supply sweet, silent, power to many small signal units both vintage and modern.
12X4			Voltage			
			test			
6X 4-WA	Sylvania	1965	High	8	\$14.00	Ruggedized joint Army-Navy
			Voltage			
			test			
6X4	Tung-Sol	1960's	High	2	\$18.00	Nice units
			Voltage			
			test			
6AU4	R.C.A.	1950's-	High	22	\$12-\$28	Orig. version of half wave rectifier used in Marantz equipment.
		60's	Voltage			
			test			

6AU4	T-S & Syl	1950's-	High	20	\$12-\$28	A good tube at a good price.
		60's	Voltage			
			test
