						guy who has a service tester and no idea what the hell he is doing, have fun. But don't expect good consistent results from your equipment!
6GK5	Mullard	1960's	Moving-Magnet Super-Line	2 4	\$46.00 \$36.00	The finest available example of this tube in fact the only other is the RCA (below). These tubes were a very late frame grid unit (this tube is very similar to half a 6DJ8) that are troublesome to make. Even "new out of the box" RCA or Mullard these tubes are all over the place and in every way, mic. and specs! I reject 75%+ of them at least. This is the reason for high price.
