12AX7/ECC83	Telefunken	1950's - 1960's	Moving-Coil	6	\$320.00+	The most famous and well known vintage 12AX7, and the all time benchmark of tonal neutrality and balance. Sweet and rich, while at the same time a bit dryer and delivering as much detail and air as any 12AX7 ever made. Both ribbed & smooth plate 5 different tubes total.
12AX7/ECC83	Telefunken	1950's - 1960's	Moving-Magnet	18	\$288.00+

						Hi-Fi's, the heller of it is many are STILL GOING!
12AX7/ECC83	RCA	1946 to mid 1950's	Moving-Magnet	6	\$166.00+	The first tooling for this tube. Plates are carbonized black. Excellent, rich & accurate sound from the heart of the Golden Age of Hi-Fi. This tube like the 60s version above is particularly great in A/D converters because they provide liquidity and sweetness AND AT THE SAME TIME MORE INFORMATION & DETAILS. = MUSIC!
12AX7/ECC83	RCA	1946 to mid 1950's	Super-Line	22	\$144.00+	
12AX7/ECC83	RCA	1946 to mid 1950's	Line	38	\$108.00+

And baby, when RCA said PREMIUM it meant the real thing, a multi-million dollar research lab and 50 years of experience! The way today's sales creeps put "Selected", "Signature" and "Platinum" on every piece of junk that comes down the pike makes me sick!!!

12AX7	Yugo/EI	1970 - 1980	Moving-Coil	4	\$68.00	Made on the orig. Telefunken machinery, the ONLY late production mini tube that has ANYTHING to do with the original tooling, machinery, etc. of any company. Contrary to the poop that is spread in the press. ("Made with original. tooling, consulting with original employees," blab blab blab). These are the Pre-War 1970's production not 80's & 90's current junk with the missing fourth port.
12AX7	Yugo/EI	1970 - 1980	Moving-Magnet	8	\$58.00	
12AX7	Yugo/EI	1970 - 1980	Super-Line	11	\$48.00

12AX7	Brimar & RFT & Fivre	1950's - 1970's	All Available	19	\$46.00	Serviceable but definitely not legendary tubes being pushed as the GREATS by several of my oh, so sloppy imitators, mainly because anyone who can pick up a phone can call England and buy 5000 of them at a time. If they were truly great they would have gone to Japan and other serious Hi-Fi hot spots long, long ago.

12AU7/ECC82	Amperex	1968 - 1978	Moving-Coil	9	\$144.00+	Orange globe logo. Made in the same factory, on the same machines in Holland, as above, but ten years later.
12AU7/ECC82	Amperex	1968 - 1978	Moving-Magnet	6	\$128.00+	Still the same fine tube. A bit faster sounding.
12AU7/ECC82	Amperex	1968 - 1978	Super-Line	10	\$108.00+	
12AU7/ECC82	Amperex	1958 - 1968	Moving-Coil	6	\$194.00	Type 2. The classic "Bugle-Boy" from the 1960's.
12AU7/ECC82	Amperex	1958 - 1968	Moving-Magnet	4	\$158.00	Light and airy extended top, yet full bodied and rich at the same time!
12AU7/ECC82	Amperex	1958 - 1968	Super-Line	4	\$148.00+	
12AU7/ECC82	Amperex	1958 - 1968	Line	5	\$108.00+	
12AU7/ECC82	Amperex	1950's	Phono	2	\$262.00+	Type 1, the first couple of toolings for this tube. As usual with tubes the rare, early version is a bit more liquid than the 60's Bugle boys. The best in the Jadis, CAT,C-J and others.
12AU7/ECC82	Amperex	1950's	Super-Line	5	\$234.00+	
12AU7/ECC82	Amperex	1950's	Line	6	\$188.00+

12AU7/ECC82	RCA	1960's	Moving-Coil	8	\$118.00+	Type 2, the classic "Cleartop" side-getter units. Classic RCA balance & creamy sound in a 12AU7. Because of its important job as a vertical & horizontal and oscillator in Televisions (RCA WAS TV for the first 20 years.) This tube was on the microscopic inspection program during the 50's & 60's. The best 12AU7 ever made in the USA.
12AU7/ECC82	RCA	1960's	Moving-Mag	23	\$84.00+	
12AU7/ECC82	RCA	1960's	Super-Line	29	\$58.00+

12AU7/ECC82	RCA	L. 1940's - E. 1950's	Moving-Magnet	8	\$136.00+	Type 1, The classic black plate 12AU7, another RCA original! Developed by RCA in the late 40's this is the original Tooling. I think all RCA minis are underrated. A very good sounding tube with a tonal balance between a Tele and a Mullard. (White logos on tube)
12AU7/ECC82	RCA	L. 1940's - E. 1950's	Super-Line	17	\$108.00+

5814 & 6189 W, WA & COMMAND	RCA All The Way!	1950's - 1960's	All available Great Stuff!	86	\$88.00 - \$148.00+ Call For Details	Top of the line industrial & military, ruggedized, pre-mium 12AU7. No miniature tubes will ever be made again that are even 1/4 this good. This line was a complete re-engineering of the 12AU7 tube. (Same as 5751 was to 12AX7) Developed for critical military & industrial applications these are true beauties! There were several tiers of ruggedness and statistical sampling, ect... culminating in the "COMMAND" series. "COMMAND" was the highest level of ruggedness & reliability reserved for armed forces and mobile use.
6680/12AU7	RCA	1950's - 1960's	All available	16	\$50's+	Premium version adapted for mobile communication use. Has loosened heater voltage requirements. I.E. Heaters are adjusted for consistent performance with widely varying heater voltages encountered in mobile

communications use.

6DJ8/ECC88	Siemens & Halski	Early 1960's	Moving-Mag	5	\$238.00	For those who have been around this tube for 30 years or so the exceptional qualities of S & H Frame Grid tubes are well known. As with the Dutch, the Germans worked well with the .00029 inch grid wire and other requirements of this tube. The good, early true S&H 6DJ8, 6922,7308, have the highest transparency of any ever made plus more liquid than the Telefunken. Descriptions
 A very good 6DJ8 made in Japan during the 60's and 70's. These units are extremely well made and have a warm, sweet tonal balance. Far, far better than anything being made in the last 35 years. Made for TVs, these were part of the first wave of electronics that helped Japan take over the U.S. Consumer electronics industry in the 60's & 70's. These are second only to the four Euro greats Ampex, Siemens & Halski, Telefunken & Mullard.

 I got stuck with these they came in with some other stuff. If you've paid more than this for these you need to find a new tube dealer! I know gobs of guys that have spent THOUSANDS on buying these from my imitators at around \$200.00+ each!
 Most said they never sounded right and went noisy after a week or so. Those who called and complained were told tough luck!

7308	Amperex Mullard Telefunken Etc.	1961 & Later	Call	Call	\$188 - \$290	<p>The 7308 was an attempt at further refining the 6922 and featured tighter control of all specs. Fabulous tube if you actually get good early production. While we are on this subject let me share with you a bit about testing these 6DJ8, 6922 "Frame Grid" types of tubes. For as many years as I have been testing & studying tubes, these have eluded me until the last few years. I can't go into details here but now I understand MUCH more about these. It's no wonder that most audio people and even tube dealers don't have any idea why they get such differing sonic results from tubes, even those of the same batch.</p>
